RE: BOCA RIO GOLF CLUB RENOVATION

Dear Bob,

Now that the bulldozers have left, the dust settled and the grass grown nice and green, I thought I would drop you a short note thanking you for your extensive involvement in this project.

The finished product is spectacular, and it was a pleasure to work with you.

Your knowledge, skill and flexibility created a wonderful working relationship that resulted in a better finished product, which can now be enjoyed by our entire membership.

This was a difficult project from the beginning, complicated by unexpected governmental dictates that adversely affected our time frame, work flow, and budget.

Your dedication to restoring Boca Rio to its original design, coupled with your vision to change certain features in order to improve the overall balance, beauty and challenge of the golf course is greatly appreciated.

There is no doubt that Boca Rio is a more challenging test for the better player, yet fairer to every level of golfer. Aesthetically, it is far superior to what existed before; some of the vistas that were created are truly breathtaking.

I would strongly recommend your services to any club seeking to create or renovate a golf course. You were highly professional and a delight to work with.

If the proof is in the pudding, then the results at Boca Rio speak volumes.

Sincerely,

Patrick M. Mucci, Jr.
Greens Chairman,
Renovation Project and Construction Chairman
